PROJECTS

Weather web app

- Developed a website where users may enter a city name to view weather information for that location.
- By selecting the "Get Device Location" button, one can also obtain weather information for their present location.
- Numerous weather details, such as the temperature in degrees Celsius, the weather, the location, how it feels, and the humidity, will be provided.
- **Tech Stack :** HTML, CSS, JavaScript
- **Github repository :** Weather App

Personal Branding Website

- Developed a personal branding website that highlights one's skills, endeavors, and successes for potential clients.
- With the use of this website, customers can easily contact freelancers to seek services.
- This website serves as a middleman, bringing together customers and service providers.
- **Tech Stack :** HTML, CSS , JavaScript
- **Github repository :** Personal Branding Website
